Address:

Pune, Maharashtra, India

Professional Summary

Computer Science and Engineering student with a strong interest in Artificial Intelligence, Machine Learning, and software engineering. Passionate about solving real-world problems through technology and developing innovative software solutions. Strong foundation in programming, software engineering, and problem-solving through academic and personal projects, with a commitment to continuous learning and professional growth. Aspiring to pursue a career in Applied Artificial Intelligence and AI Engineering, with a focus on building intelligent software solutions for real-world challenges.

Education

Bachelor of Computer Science and Engineering

Symbiosis Institute of Technology, Pune, India

Expected Graduation: 2027

Relevant Coursework:

Data Structures and Algorithms, Database Management Systems, Operating Systems, Computer Networks, Artificial Intelligence, Machine Learning, Discrete Mathematics, Theory of Computation, Cloud Computing, Distributed Systems, Software Engineering

Projects

Carbon Emission Analysis & Business Carbon Savings Simulator

Developed a data analysis project to analyze carbon emissions and simulate business carbon cost savings using data analysis and visualization techniques.

Prediction of Mental Health of Teenagers

Developed a machine learning model using Python to predict mental health conditions based on behavioral and survey data.

StudyAssistant – Student Productivity Platform

Designed and developed a platform to help students manage time, tasks, and academic progress effectively.

Python Games Development (Snake Game & Elevator Simulation)

Developed two Python-based games including a Snake game and a basic Elevator simulation game. Focused on logic building, problem-solving, loops, and conditions using Python.

Technical Skills

Programming Languages: Python, Java, C, C++, SQL, JavaScript, HTML, CSS

Artificial Intelligence & Data: Machine Learning, Data Analysis, Data

Visualization Computer Science: Data Structures & Algorithms, Database Management Systems (DBMS), Operating Systems, Computer Networks

Tools & Technologies: Git, GitHub, Microsoft Excel

Certifications

- CCNA – Introduction to Networks
- CCNA – Switching, Routing and Wireless Essentials
- Introduction to Machine Learning
- Data Visualization
- Python Programming
- Web Development (HTML, CSS, JavaScript, Bootstrap) – Infosys Internship
- House Price Prediction using Linear Regression
- Fundamentals of Operating Systems

Professional Experience**Sales and Shop Assistant**

Worked in a bookstore and mobile services shop providing school supplies, accessories, and mobile services. Developed customer service, communication, sales, and basic business management skills.

ERP Accountant – Al-Mutakamel Accounting System (Yemen Soft)

Worked using an ERP accounting system that managed sales, purchases, daily journal entries, accounts receivable and payable, inventory management, and financial transactions. Responsible for recording transactions, managing invoices, tracking inventory, and handling financial records using the ERP system. Gained practical experience in accounting systems, business operations, and enterprise software.

Sales Representative and Goods Distributor

Worked in product distribution and sales in local markets. Responsible for selling products, collecting payments, and communicating with customers and shop owners. Developed negotiation, communication, and business skills.

Activities / Leadership

Project Based Learning (PBL) Projects and Presentations
Teamwork and Project Collaboration
Technical Presentations and Seminars
Self-learning in Data Science, Artificial Intelligence, and Business Analytics
Participation in academic and technical projects

Languages

Arabic – Native
English – Professional Working Proficiency
